Good News!

Ann Shaddock, National Chair for the DAR Genealogy Preservation Committee, recently announced, “Due to the diligent work of thousands of DAR volunteers, the categorizing and indexing of over 8.5 million documents for Supporting Documentation Project was accomplished in March 2020”.

The goal of the committee was to index DAR genealogical and membership information into computerized and searchable databases, and this goal has been met. The national committee is working on finding an alternative project for all of our amazing volunteers but at this time nothing has been decided.

If you are interested in doing some online volunteer work the Patriot’s Records Project is similar. That project lets you truly delve in to history as you index documents from Revolutionary times. It is a satisfying online project that you can work on from your own computer.

Many thanks to all the wonderful Kansas daughters who devoted countless hours for the Genealogy Preservation project! Your work makes it so much easier for others to join the DAR!
